

Legislative District Update Instructions

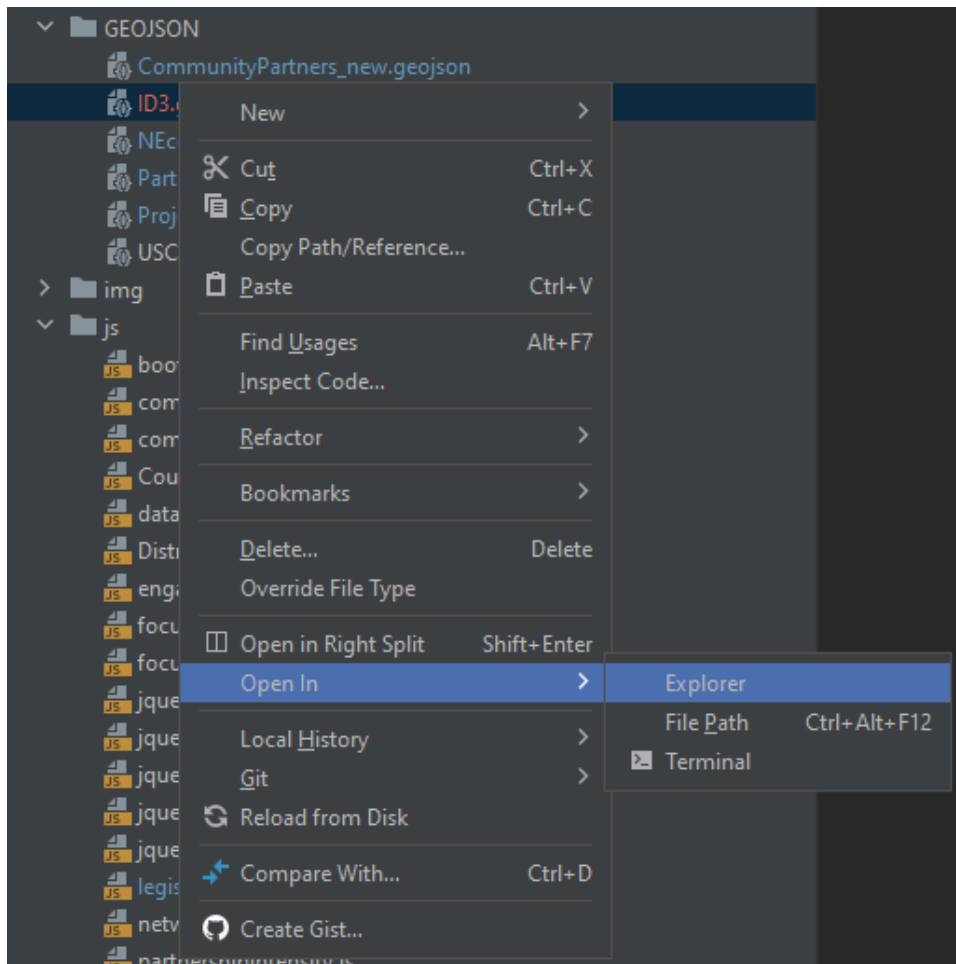

In order to update the legislative district map, you must swap out the ID geojson files in the project.

This tutorial assumes you are using the Pycharm IDE.

First, navigate to this folder in the project

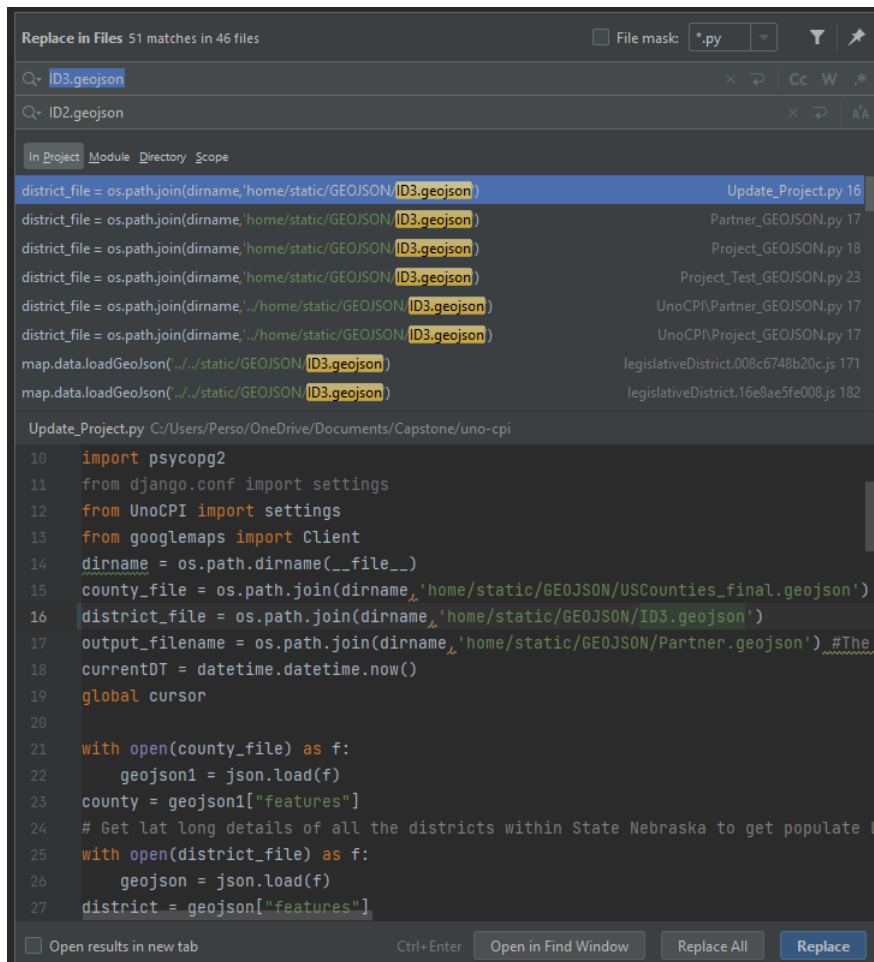

Then, right click on the any file in the GEOJSON file and select Open in>Explorer to open the folder the ID geojson file is in.

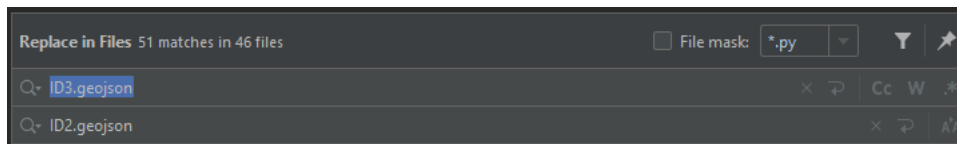

Copy and paste your new ID geojson file into the same folder that your old geojson file is. Make sure your new file is named ID, then a different number than your outdated file that you are replacing.

| Name | Date modified | Type | Size |
|-------------------------------|--------------------|--------------|----------|
| CommunityPartners_new.geojson | 11/6/2022 10:22 PM | GEOJSON File | 100 KB |
| ID3.geojson | 11/6/2022 10:13 PM | GEOJSON File | 6,771 KB |
| NEcounties2.geojson | 11/6/2022 10:22 PM | GEOJSON File | 150 KB |
| Partner.geojson | 11/6/2022 10:22 PM | GEOJSON File | 942 KB |
| Project.geojson | 11/6/2022 10:22 PM | GEOJSON File | 453 KB |
| USCounties_final.geojson | 9/20/2022 11:13 PM | GEOJSON File | 2,888 KB |
| ID2.geojson | 10/30/2022 8:05 PM | GEOJSON File | 1,995 KB |

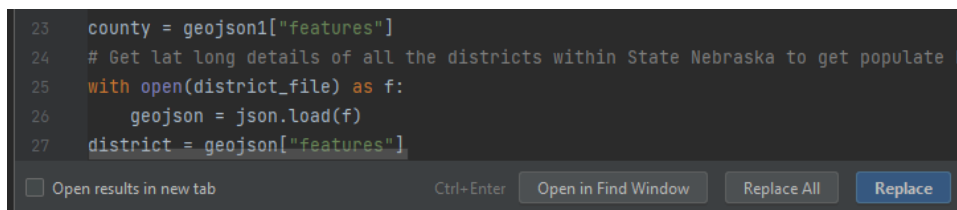

Enter CTRL + SHIFT + R to bring up the Replace in Files popup. Ensure that 'In Project' is selected.

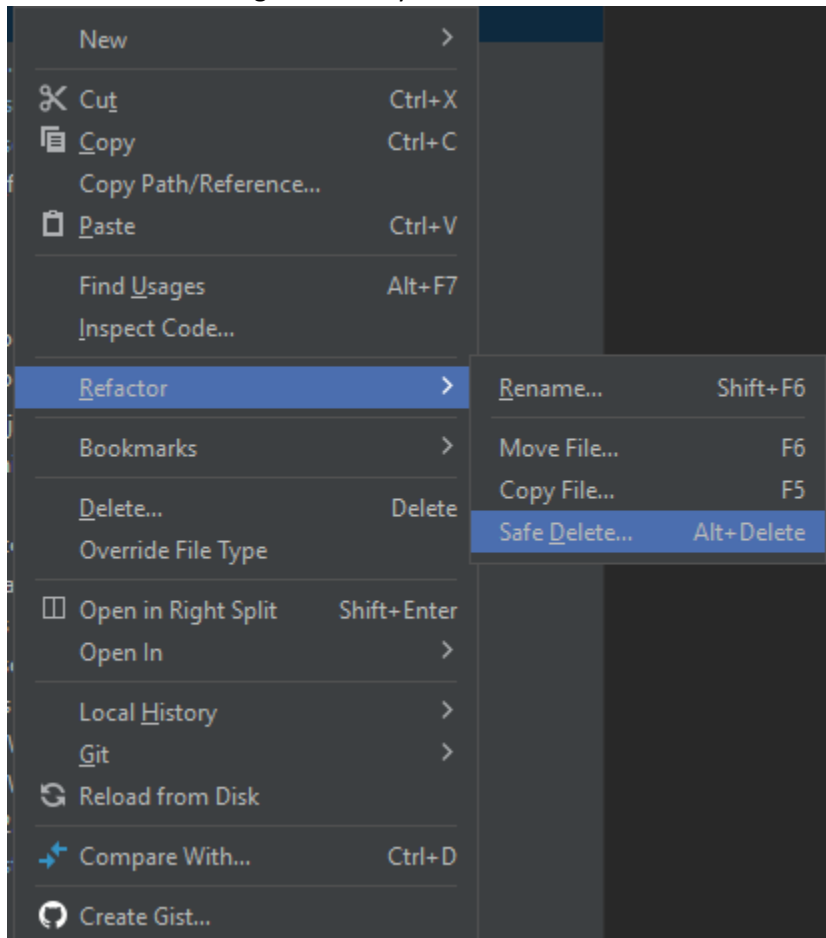

Enter the name of the current geojson file on top and the name of the replacement geojson file on the bottom.

At the bottom of the pop up window, hit Replace All to change all the references from your previous file to the current file.

Delete your outdated file from the project. Make sure to 'Safe Delete' the file, in case any references to the file weren't changed correctly.

Your legislative district map should be updated.
